

Season's Greetings and all the best for the New Year to you and your family from the AllYouNeed Hotels.

Your AllYouNeed Hotel Team

Instruction

Print and decorate your very own Christmas tree. Good Luck!

How to make the tree:

1. Cut out the four halves of the Christmas tree.
2. To get a green and stable tree glue the two halves together that have the white line on the same part of the tree. Now you should have two halves that are green on both sides.
3. Cut each half along the vertical line.
4. Take the tree-half which you cut from the top and plug it into the cut of the other half coming from below.
5. The tree should be able to stand on its own when the edges are pointing in the four directions.
6. To make the tree more stable you can cut out the 4 big stars, bend each one at its half and glue them together on the top of the tree. This prevents the tree from collapsing.

How to decorate the Christmas tree:

1. Cut out the ornaments you would like to put on your tree. Please mind not to cut off the green part.
2. Bend the green part to the back and make a short horizontal cut into your tree wherever you want to place the ornament.
3. Put the ornament into the cut. You can decorate all sides of the tree likewise.

The AllYouNeed Hotels wish you a lot of fun with your Christmas tree!
